

2018 Fastest-Growing Companies: Revenue Over \$25 Million

August 28, 2018

Our fastest-growing companies lists have finally arrived.

This year's much-anticipated Fast 50 lists are divided into two categories: companies with over \$25 million in revenue last year, and those with under \$25 million in revenue. The businesses recognized show sustained revenue growth from 2015 to 2017, and are ranked by their percentage growth during that period.

The diverse group of companies featured on our lists illustrates the many avenues to success in business in our region. This year's over \$25 million list was led by a staffing company, Hayes Locums, while the under \$25 million list was led by a technology company, Cardplatforms – with the latter growing revenue more than 970 percent over the course of two years.

The most popular growing sector featured on our lists this year is construction, with six companies on the over \$25 million list from that industry, and at least four companies between the two lists from construction-related fields.

Technology accounted for nearly another fifth of the companies on our lists. Still, the lists are truly representative of South Florida's top sectors, including employment agencies, accounting firms, insurance companies, public relations firms, an automotive group and a couple of law firms.

The South Florida Fast 50 companies were feted at an Aug. 16 awards ceremony at Miami's Jungle Island. The event was presented by the Kellogg School of Management at Northwestern University and sponsored by Ascendo Resources, BankUnited and Daszkal Bolton.

Congratulations to all companies featured on our lists. The Business Journal looks forward to documenting your continued growth and success.
